DETAILED ACTION

1. This office action is in response to Applicant's response filed on 09/15/2005.
2. Claims 1, 2, 5-20, 22, and 24-29 are pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 1, 2, 5-7, 8, 9, 15, 18 10-14, 16-20, 22 and 24-29 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Mitsugi (U.S. Pat. No. 5,353,023) in view Kakihara et al (U.S. Pat. No. 6,959,282).**

As per claims 1, 6, 7, 8, 9, 15, 18, 10, 16, 17, 18, and 24-29 Mitsugi substantially discloses a car (or object) navigation system that is adapted to be installed on a car for estimating a location of the car or object, detecting occurrence of an accident and performing communication data, a location unit for generating car location (or object location) (which is seen to read as Applicant's claimed invention wherein it is stated that a wireless communications system at the same location as the object, the system comprising:

An object (or CAR) that is insured or capable of being insured by the insurance product (see., abstract, col 1, lines 44-68, col 2, lines 37-48);

A wireless communications system at the same location as the object (see., abstract, col 1, lines 44-68, col 2, lines 37-48, col 3, lines 43-68, col 4, lines 41-54, figs 1A-3);

A location determining system associated with the object (or CAR) and capable of determining the object's location at any time (see., abstract, col 1, lines 44-68, col 2, lines 37-48, col 3, lines 43-68, col 4, lines 41-54, figs 1A-3);

A data collection system configured to collect data at predetermined intervals from the location determining system, the data including a present location of the object determined from the location determining device (see., abstract, col 1, lines 44-68, col 2, lines 37-48, col 3, lines 43-68, col 4, lines 41-54, figs 1A-3, specifically fig 1A, items 100 and 300);.

Mitsugi fails to explicitly disclose wherein said **the pricing system configured to price or sell the insurance product (or company), based on the data (or based on the location of the object or car).**

However, Kakiyama discloses a toll collection arrangement based on the position and travel of a vehicle. A charging information for the vehicle is created based on the position of a moving body as well as buffer areas and map information, then even if there are detection errors in the detection of the position of the vehicle (see., abstract, col 2, lines 42-62). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the navigation system for cars of

Mitsugi by including an insurance product or company that is connected to the navigation system as taught by Kakiyara Murakami since it is an alternate means for acquiring insurance information about the location of a car/object.

As per claims 2, 12, 13, 14, 20 and 22 Mitsugi discloses the claimed limitation, wherein the price system is in electronic communication with the data collection system via wireless transmitter (see., abstract, col 1, lines 44-68, col 2, lines 37-48, col 3, lines 43-68, col 4, lines 41-54, figs 1A-3, specifically fig 1A, items 100 and 300).

As per claims 5, 11 and 19 Mitsugi discloses the claimed limitation, wherein the data relating to the product is data relating to at least one selected operational parameter, temperature, humidity, hours of operation, and time between service [see., abstract, col 1, lines 44-68, col 2, lines 37-48, col 3, lines 43-68, col 4, lines 41-54, figs 1A-3, specifically fig 1A, item 100, the car location estimated unit, for estimating traveling (hourly) information].

RESPONSE TO ARGUMENTS

5. Applicant's arguments filed on 09/15/2005 have been fully considered but they are moot in view of new ground (s) of rejection. A newly found prior art (Kakiyara et al U.S. Pat. No. 6,959,282) is provided.
